DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed June 30, 2006 and March 3, 2008 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

No copy of the crossed out Foreign Patent documents have been found in the file.

Allowable Subject Matter

Claims 11 – 20 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest a directional coupler with the claimed structure further including galvanic isolation of the conductor layer. In particular, Banba (Applicant's cited prior art) shows a three line directional coupler comprising three metallic layers but does not show galvanic isolation of the conductor layer where the ground layer (12) is formed on the same layer as the coupling elements and lead outs thus not providing galvanic isolation. Scott also shows a three line directional coupler further comprising capacitive stubs but as with Banda above, does not teach or suggest show galvanic isolation of the conductor layer nor is there any reason to combine the prior art of record thus the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Scott shows a hybrid coupler.
